

# Essex Young Farmers Show 17<sup>th</sup> May 2020 - Health, Safety, Environmental Risk Assessment

As part of your application you are required to formally assess the potential risks involved in the activities and layout of your stand. The assessment should look at the activities on your stand and record the associated hazards and potential consequences. With these identified, you are required to assess the risk combining probability and severity and then identify appropriate control measures to reduce severity and/or probability and calculate the revised rating. We have provided within this pack some examples of potential risks for you to consider and tick as appropriate. There are also some blank lines for any hazards particular to your own business. **Please do not amend our ratings as these are considered before and after applying your control measures.**

**\*We are happy to accept your own Risk Assessment in lieu of ours if you have a prepared copy available.**

<b>Tradestand /Exhibitor/Company name:</b>				<b>Date:</b>		
<b>Area of the Show (circle as appropriate):</b> Trade stand   Rural Crafts & Shopping   Catering   Festival of Food   Horticultural Tent   Main Ring Attractions Game Fair   Steam/Traction Engines   Vintage Tractors   Forestry Area   Equine Area						
Activity	Hazard What has the potential to cause harm?	Potential Consequences (s) What harmful instance could occur?	Risk Rating (Before Control Measure) 1 Low –10 High	Control Measures What has been done to prevent a hazard from occurring?	Revised Risk Rating 1 Low –10 High	Applicable to my business <i>*Please tick</i>
